PROCEDURE FOR A DOCTORAL CONTRACT WITH FINANCING OTHER THAN CLERMONT AUVERGNE UNIVERSITY

The recruitment procedure **for any other contract** (other than the establishment doctoral contract presented above): Region, CIFRE, EPST, ARC, ANR, INCa, Europe..., where the **selection** is made “**on the fly**” », Is carried out with **the team concerned which is responsible for the selection of the doctoral candidate**, but it must **imperatively associate the ED with each stage of this selection**.

The process is as follows:

1 - Inform the ED of the proposed thesis subject, the type of funding obtained.

2 - Give the ED the composition of the jury set up for the selection of candidates. The **participation of a member of the ED Bureau** could in some cases **be requested** by the direction of the ED. Imposed in the ED Internal Regulations, **it will be made compulsory in September 2019** (with the exception of joint supervision theses, those for which the funder defines its own selection criteria and CIFRE theses, in which case the jury of hearing is organized according to the specific methods of the financier).

3 - Transmit to the ED the list of candidates who will be interviewed.

4 - Ensure that the successful candidate has an AB mention in Master 2 and give their classification of Master 2.

5 - Transmit to ED SVSAE the report of the hearing.

The two mandatory criteria for registering for the ED are an AB mention in the Master 2 and funding for 3 years of thesis.

The classification in the first part of the promotion of Master 2 is strongly recommended.

If this classification happens to be in the second promotion part of the Master 2, the director of the ED talks with the prospective thesis director to better assess the skills of the future doctoral student, or even warn him about possible difficulties ahead. The Bureau may ask to interview the candidate if there is any doubt as to their ability to carry out research work.

In case of refusal of registration, an explanation is given to the thesis director and the candidate.

In the case of candidates outside the European higher education area, an equivalent level of Master 2 is required and the candidate must at least have carried out a research activity of 5 months.

For a Region and / or EPST doctoral contract, the selected candidates can be auditioned at the time of the competition for the award of doctoral contracts at Clermont Auvergne University by the same selection jury (but only if the time slots allow).
